

5

Things Every Dentist Needs to Know About Teledentistry

05

Virtual consults have 0 infection risk. Every appointment that can be replaced with a virtual consult is a 100% reduction in risk for that appointment.

04

When appointments require an in-office visit, teledentistry enhances risk mitigation by enabling more comprehensive pre-screening.

03

"In-office teledentistry" means hygiene teams can help dentists do limited or periodic evaluations or even case present without needing to don and remove PPE.

02

Dental professionals love the efficiency of asynchronous exams / evaluations. And with TeleDent they can followup by sending patients digital case presentations.

01

Teledentistry allows dentists and hygienists to retain face-to-face patient interactions that build relationship, trust and case acceptance.
